

Intent:

At Stanhope Primary and Nursery School, we believe that Geography helps to provoke and provide answers to questions about the natural and human aspects of the world in which we live. We hope to inspire children's curiosity and interest to explore the local area as well as the wider world and its people, which aims to ignite a love of learning for Geography. We intend to equip children with geographical skills to develop their knowledge through studying places, people and natural and human environments. Geography, by nature, is an investigative subject. Through our teaching, we intend to provoke thought, questions and to encourage children to discover answers to their own questions through exploration and research to enable them to gain a greater understanding and knowledge of the world and their place in it.
